Comments from  
BOS Basel 2019  
attendees which  
took place on the  
19th/20th June,  
2019"

This meeting was a very useful way of catching up on latest regulatory requirements and best practices for outsourcing strategies. The questions and discussions following the presentations allowed participants to compare experiences and learning points. It was also a great opportunity to meet with service providers for an initial discussion or with friends and colleagues for an update.

Paul Madeley, Managing Director,  
Synth-Isis Ltd.

The Bio2Business conference was a great opportunity for Acino Contract Manufacturing to present ourselves as a flexible and reliable CMO, that is trying to disrupt the way pharma companies and CMOs are working together by changing the mindset of the relationship and enable both partners to be more agile. We had many interesting discussions and visited very exciting speeches of different customers, suppliers and industrial professionals, which will help us to further develop our services and our customer centric way of working. Especially as a company that originates in the area of Basel, we were very happy to sponsor the Bio2Business conference and thereby strengthen the industry next door to our production facilities.

Felix Faupel Head of Contract  
Manufacturing, BOS Basel 201.

Very well organised, pertinent and useful conference bringing buyers and suppliers together. Participating you can gain important inputs for the evaluation, selection and maintenance of the critical and complex buyer - supplier relationship in the pharmaceutical development and manufacturing sector.

Fabio Fais, Director CMC Projects,  
Auris Medical.

BOS Basel 2019 was again a very interesting event to meet, have good business discussion and increase network at small and large Pharma. Also to attend some interesting sessions on latest technical/scientific developments of value to our industry.

Pedro Rosado, Director  
Business Development, SK  
biotek Ireland.

Great event: well organized and delivered presentations interesting and well connected to my job 1:1 sessions not invasive and agenda up to the attendee.

Andrea Calenne, Senior  
Manager External  
Manufacturing, Biogen.

The BOS is a good stage to get connected with manufacturing managers throughout the industry, from small molecules to biologics, to vaccines. It was great to hear the problems from the client side and the CMO side alike, the challenges and the trends.

Andrea Aspoeck Head of  
External Manufacturing,  
Hookipa Biotech AG.

## PARTNERING AT BOS EVENTS 2023

General Partnering: To open 2 weeks prior to the event and to close on the afternoon proceeding the event. Any participant can send a meeting request to another participant provided that person has not made themselves unavailable for the meeting timeslots or that all their time slots are full.

**Bio2Business BOS Events**

Bio2Business was established in 2004. We create and produce events for the pharmaceutical R&D community specifically to facilitate partnering and advance business opportunities between pharma and biotech and CRO and CMO suppliers. Looking forward to post pandemic times we will focus on our new and innovative virtual platform, BOS Virtual 2021 for the duration of this year before returning to face to face in 2022 with events in Basel and Manchester (alongside the virtual platform). We look forward to seeing you virtually and in person in the near future.
