

# Parvulet™

PATIENT-CENTRIC DOSING SOLUTION

**Advancing the Needs of Patients  
with Swallowing Disorders**

## Parvulet addresses multiple challenges

- Ideal for patients with swallowing difficulties
  - » *Dysphagic patients*
  - » *Mucositis patients*
  - » *Pediatric & geriatric populations*
- Allows for high drug loading
- Accurate dosing with every treatment
- Improves patient adherence
- Texture is easy to swallow
  - » *Masked for taste and smell*

## Parvulet is a patient-friendly format

Studies show 60-79% of the geriatric population and 25-45% of the pediatric will experience difficulty in swallowing.\*

Oral solid dosage form with final texture similar to that of apple sauce:

- Easily administered in 30 seconds
- Swallowing aid built into formulation
- Mimics natural swallowing mechanism with no choking hazards
